

PRIMER - HAFT GEL

Additional Information

Description:

Haft Gel (Primer Gel) works like a double-sided adhesive tape, adhering to the nail and perfectly preparing it to receive the next product. Cures under UV or LED.

It should be used in minimal quantity, almost like “dirtying” the nail. It should not be applied as a stretched layer, as this would be excess product.

If used in excess, it does not harm the natural nail, but may have the opposite effect, such as lifting.

Risks and Precautions:

Keep out of reach of children.

Avoid contact with eyes.

If it comes into contact with eyes: rinse carefully with water for several minutes. If you wear contact lenses, remove them if possible.

If irritation persists, seek medical advice.

Directions for Use: Spread the product on the natural nail (almost like dirtying the nail) with the help of a brush. Cure under lamp for 60 seconds.

Ingredients: Urethanacrylate Oligomer, Glyceryl Proxy Triacrylate, Chinol, p-Hydroxyanisole, Benzoyl, Isopropanol, CI 60725.

Capacity: 5ml
